This is a brand new role! As Mogo's Senior Credit Risk & Collections Analyst, you will provide data mining, analytics and statistical support to the organization in a credit risk and collections capacity. You will be the lead analyst responsible for developing, monitoring and optimizing the organizations consumer credit risk and collections models, and for providing business intelligence to the sales, lending and collections management team. You will be a key resource for identifying and validating opportunities to increase sales and margins by development and improvements to overall risk management and collection strategies.

Our ideal Analyst:

- B.S. in quantitatively oriented field (statistics, economics, applied mathematics, engineering). MBA or Masters Degree in quantitative discipline preferred.
- 3 to 5 years work experience in business analytics, data mining, and reporting.
- Minimum 3 to 5 years in the Financial Services industry, preferably in Consume Credit.
- Advanced PC and MS Office skills, specifically Excel (graphs, charts, formulas, macros, VBA).
- Experience working with consumer credit risk models, including scoring, segmentation, decision trees, scorecard development.
- Familiar with statistical techniques including regression, decision trees, and segmentation techniques.
- Proven decision-making and analytical skills.
- Ability to stay organized and to prioritize tasks/goals to meet business objectives.
- Ability to work under pressure and multi-task in a fast-paced environment
- Ability to manage projects and deadlines independently.
- Strong written and verbal communication skills in English.

Additional qualities that will help you succeed in the role:

- Demonstrated experience in a dynamic, high-growth company/organization.
- Experience in data mining & data extracts from a variety of operating systems, such as AS 400 platforms, web-based and/or SQL Databases, and legacy-type systems.
- Previous experience or knowledge of basic project management.
- Experience working with a in internal or outsourced call centre.
- Statistical programming skills, e.g. SAS, Oracle, Java, SQL.
